PROJECTS

1 Cinema Paradiso

In this web application you will find many informative movie reviews, you can compare different reviews on current, upcoming, recent, or vintage movies and even get a sneak-peek at the trailers. You can filter the movies by genre. This extension is built in a more user-friendly manner where they can save time by loading all the currently playing movies in a single click.

- Technologies Used:- Frontend: React and Redux, Backend: Django API.
- GitHub:- github.com/muazzamali1012/CinemaParadise-GD
- Website:- frontcinema.herokuapp.com/

2 Tea Shop

This is an online food menu service for Tasty Tater. These days, when you visit a restaurant, you often use the QR code to load the PDF of the menu. It has no image and is not easy to select items. So we created the menu app where you can see food images with the needed information and select your items easily. During such an unprecedented time and social distancing, online menu card technology is a boon!

- Technologies Used:- Frontend: React and Redux, Backend: Django API.

3 Twitter Clone

With this project, we created a platform where you can express your thoughts anonymously, and showcase your pictures and much more on a single website. Post, edit, or delete posts at the convenience of just a few touches. This project is based on Twitter and anonymity adds to its special features. Without the necessity of an account, you can share your thoughts and memories with

EDUCATION

Full Stack Developer

TECH I.S Coding Bootcamp

📅 Mar 2022 – Aug 2022

B.S. in Mechanical Engineering

Arba Minch University

📅 Oct 2013 – Jul 2018

the world at any time. You can even learn CRUD(Create/Read/Update/Delete) through this project.
